Black Locust

Robinia pseudoacacia

Height: 50 feet

Spread: 30 feet

Sunlight:

Hardiness Zone: 3b

Other Names: Common Locust

Description:

A tall, loose shade tree with highly fragrant and very showy chains of white flowers in spring; extremely adaptable, performs well in poor soils; spiny branches, tends to sucker and form colonies of trees, good for large-scale naturalizing

Ornamental Features

Black Locust has chains of fragrant creamy white pea-like flowers with yellow eyes hanging below the branches in late spring. It has bluish-green deciduous foliage. The oval pinnately compound leaves turn yellow in fall.

Landscape Attributes

Black Locust is a deciduous tree with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a high maintenance tree that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Shade
- Naturalizing And Woodland Gardens

Planting & Growing

Black Locust will grow to be about 50 feet tall at maturity, with a spread of 30 feet. It has a low canopy with a typical clearance of 5 feet from the ground, and should not be planted underneath power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 60 years or more.

This tree does best in full sun to partial shade. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for xeriscaping or the moisture-conserving landscape. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This species is native to parts of North America.
